

Scheduling Brewing—Elena V

You can program the machine to make your coffee at a scheduled time.

1. Set the desired brew time.

To set the brew time, hold down Prog/Auto On until both the button and the screen are blinking. Push the Min button to set the minutes and the Hr button to set the hour.

Program/Auto On button illuminated

2. Empty any remaining coffee in the pot from previous use, briefly rinse.

Measuring lines shown on coffee pot.

3. Fill the coffee pot to the desired amount of water using the measuring lines on the pot. Pour into the water reservoir.
4. Rinse reusable coffee filter or replace the paper filter.
5. Pour one scoop of grounds for every two cups of water.
6. Push the Prog/Auto On button once. The button will illuminate, which means the coffeemaker is set. At the desired time, the machine will switch from Prog/Auto On to Brew/Off, and the coffee will brew in five minutes.

Do not put whole beans in the coffee filter. Only use ground coffee.
